Experience

Pepix Technology | Software Engineer (Freelance)

Remote
Sep 2023 - Dec-2024

- Managed all aspects of development while maintaining direct communication with the client and users, collecting feedback and ensuring the project matches their expectations.
- Designed and implemented the front end of an internal custom dashboard for managers & employees of real-estate agency to track contact-requests from customers.
- Automated build, test, and deployment for frontend and backend using GitHub Actions and created CI/CD pipeline which reduced deployment time by **90%**.
- Migrated the database system from on-premise to the cloud with **zero downtime**.
- **Tech Stack:** *Next.js, Laravel, PHP, MySQL, Github Actions, Docker.*

Aneesi | Software Engineer (Contract)

Remote
Jun 2023 - Sep 2023

- Led the entire API gateway & frontend dashboard development process from ideation to execution.
- Created and implemented a (CI/CD) pipeline that automated workflows.
- Developed a Chrome extension for scraping LinkedIn profiles and company data to identify leads.
- Integrated HubSpot using RESTful APIs, OAuth authentication, and webhooks.
- Integrated AI to generate & send tailored messages, automating outreach to leads for targeted marketing.
- **Tech Stack:** *Node.js, TypeScript, Nest.js, Docker, OpenAI API.*

Torood | Software Engineer

Gaza, Palestine
Nov 2022 - Aug 2023

- Refactored code base from Circuitry Breaker to Retry with exponential backoff
- Containerized the backend system & wrote custom deployment scripts.
- Implemented backend integration & unit tests, elevating test coverage from **0%** to **70%**.
- **Tech Stack:** *JavaScript, Node.js, Express.js, AWS, Docker, Sequelize.js, PostgreSQL.*

Lazzaro | Software Engineer (Part-time)

Remote, Spain
June 2022 - June 2023

- Automated recurring multi-currency donation processes which streamlined NGOs transactions and expand their global reach.
- Implemented client-side validation systems which increases system availability and decreased inbound server's bandwidth.
- Designed Web3 solutions for NFT and secure digital transactions.
- **Tech Stack:** *Javascript, Smart Contracts, Solidity, Web3, ReactJS, Express.js, Sequelize.js, AWS, Stripe, Mollie.*

Projects

Babel [↗](#)

- Migrated helper classes for compiler construction into Typescript which defines, modifies, or describes properties on objects programmatically.
- Contributed and refactored Temporal Dead Zone classes decreasing the code output size.

Education

B.Sc. Al-Quds Open University, Information Technology

2020 – 2025

Certificates

- [A Cloud Guru | AWS Certified Cloud Practitioner \[↗\]\(#\)](#)

Skills

Languages: Javascript, Typescript.

Tools & Frameworks: React.js, Next.js, Tailwind CSS, Node.js, Express.js, Nest.js, REST API, SQL, Nginx, Git, GitHub Actions, AWS.
